About

Over the past 6 years, I have been working as a ReactJS Developer, honing my skills in developing complex web applications and user interfaces. I have a deep understanding of ReactJS frameworks such as Redux, NextJS, and GatsbyJS, and I am proficient in using tools such as Git, JIRA, and Trello to manage projects and collaborate with team members.

My experience includes developing responsive websites, implementing RESTful APIs, integrating third-party libraries, and optimizing web applications for performance. I have also worked with a wide range of technologies such as HTML, CSS, JavaScript, and NodeJS to deliver high-quality web solutions to clients across different industries.

What sets me apart from other developers is my ability to work effectively in a team environment and my commitment to delivering projects on time and within budget. I am a quick learner and I am always willing to take on new challenges to expand my skillset.

Work Experiences

ReactJS Team Lead at HDBank   10/2021-Now
Development, and implementation of a Fintech Product to enable Vietnam customers to Buy Now, Pay Later services. Muadee by HDBank, One of the first BNPL products made by the Bank in Vietnam.
